

## Renewable Energy New Zealand

The RENZ Foundation was launched in 2005 to support initiatives aimed at providing Renewable Energy solutions to New Zealand's fossil fuel dependency, and in doing so, minimise the generation of greenhouse gases.

RENZ is committed to attract donations, grants and the expertise that will assist in identifying and exploiting the clean energy sources needed to sustain New Zealand's clean green image, in harmony with its energy dependent culture and lifestyle.

The RENZ Foundation is a charitable trust. Be a RENZ supporter - donations are tax deductible.

Talk to us about your Clean/Renewable Energy or Hydrogen Economy project.
